“ GE Security is committed to being the world’s premier security company offering innovative technology solutions to help our customers protect people, assets and communities. From home to industry to national security, technology from GE Security covers the full spectrum of security and life safety solutions. We provide tailored market solutions and are continuously on the look out for new challenges to invest and deliver” – Bart Otten – President and CEO GE Security EMEA

General Electric

General Electric is a global infrastructure, finance, and media company taking on the world’s toughest challenges. GE is a company with a great heritage. Founded in 1878 by Thomas Edison, it is the only company on the Dow Jones Index that was in the original list in 1896. Over 100 years of GE global research has earned two Nobel prizes and thousands of patents. GE is imagination at work. From jet engines to power generation, financial services to water processing, and medical imaging to media content, GE employees worldwide are dedicated to turning imaginative ideas into leading products and services that help solve some of the world’s toughest problems.

- \$183 billion global revenues in 2008
- 300,000+ employees
- Operations in over 100 countries
- More than 50% of revenues outside of US

GE Security

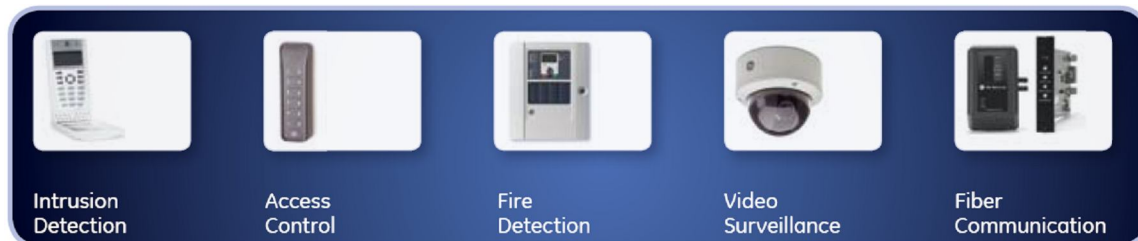

As part of General Electric, GE Security embraces the same values that have made GE one of the most respected companies in the world. GE Security resides under the corporate umbrella of GE with all the resources, financial strength and quality that a global brand of this scale represents.

GE Security continuously addresses evolving real-world security challenges and delivers quality products and integrated solutions that contribute to our customers' growth and result in greater satisfaction and return on investment for end users.

- Global Headquarters in Bradenton, Florida
- Globally present in more than 35 countries
- 6,000 employees worldwide
- Global CEO: Dean Seavers
- EMEA Headquarters in Brussels, Belgium
- EMEA President: Bart Otten

GE Security is truly a global company focused on manufacturing and distributing security products and solutions with sales and support operations across the world. In EMEA alone, GE Security is represented in 29 countries and focuses on supporting our local customer base, in local languages and with a strong knowledge of local approvals, public services, insurance and general market requirements. Additionally, certified partners complete our coverage and service footprint across the EMEA region.

GE Security's robust product offering is designed to protect and secure your business, your home and your family via a full spectrum of security and life safety applications. Our products lead the industry in innovation and reliability. From intrusion and fire sensors to control panels, from commercial cameras and digital video recorders to high-end intelligent networked surveillance systems, from stand alone cards and readers to networked access control – all seamlessly working together – GE Security has the product portfolio that will meet your security needs.

Our products can be seamlessly integrated over an IP network using Facility Commander® Wnx, Alliance or Omnicast™ management software. Alternatively, our enterprise security systems can be integrated with time & attendance, human resources and other database driven systems across countries, regions and the entire globe.

1X Series life safety control systems, a brand new range of conventional fire panels suitable for small to mid-sized structures. This series is engineered to exceed users' expectations by offering a simple solution to meet individual needs.

As part of GE Security's plan to deliver innovative technology, this product line is designed to provide reliable performance and operation in one package. The 1X Series has two, four or eight zones that support up to 32 devices per zone, as well as up to four supervised relay outputs dedicated to sounder control and fire routing. Supervised and unsupervised conventional relay outputs are also available.

Designed for pan-European compliance, the product line conforms with the latest EN norms (**EN54 part 2 (Fire detection and fire alarm systems — Control and indicating equipment)**, and **EN54 part 4 (Fire detection and fire alarm systems — Power supply Equipment)**), is CPD certified and meets several country specific standards, including British standards (BS5839-1), Dutch Standards (NEN2535/NEN2575), and Belgian standards (NBN S21-100)

GE Security products and solutions are continuously improving with new features and functionalities, taking advantage of new technologies. Recognizing the importance of sharing knowledge and expertise, the GE Security EMEA Training University offers a wide range of highly informative and in-depth training courses. Our trainers are GE Security industry experts with a thorough product knowledge and field experience.

Our courses provide you with the opportunity to learn all about our products while refreshing your understanding of the underlying technologies. Training certification gives you a competitive advantage for the success of your business.
